Kristina Salnyk

Fullstack Developer

I am a qualified specialist in the field of information technologies aimed at self-realization as a fullstack developer and strive to contribute to the creation of modern and efficient web applications. I possess markup and programming technologies that are current and fully meet the standards of the last 2 years and ready to expand and use them in practice. I am directed to excellent communication and harmonious teamwork. I agree about passing the internship period and studying additional technologies and frameworks.

Tech skills

- HTML / CSS / SASS
- JavaScript
- TypeScript
- WebPack
- Parsel
- React
- Redux
- React Native
- Node.js
- MongoDB
- SQL
- REST API
- Git

Soft skills

- The maximum contribution to common goals
- Exceptionally willing and successful as a team worker
- Optimal workflow organization
- Competent communication and search for compromises

Languages

- Ukrainian - Proficiency
- English - Intermediate
- Polish - Elementary

Project Experience

Green Land [.apk file][React Native, JavaScript, Expo, REST API] - Link
The mobile app provides a service for creating and searching for points of waste sorting. Team project, role: Dev. Implementation of the global state using the context, navigation config, creation of screens and logic for user registration, login and logout, profile management, and functionality from the side of the service provider company. Integration with the backend using Axios. Styling with Styled-Components.

Phone Book [React, Redux Toolkit, JavaScript, REST API, Material-UI] - Link
A web application for working with a collection of contacts and the possibility of user authorization.
Using asynchronous Redux within Redux Toolkit for state management. Implementation of private and restricted routes for authorized users. Styling components exclusively with the Material-UI library.

Filmoteka [JavaScript, DOM, Handlebars, AJAX, Axios, FireBase, SASS] - Link
A website for searching and saving movies, integrated with The Movie DB. Team project, role: Team Lead. Organization of the team's work, division of tasks, and assistance to project participants. Creation of the structure and configuration of the project using the Parcel bundler. Creation of shared markup and markup of collection elements using Handlebars, and stylization of elements using SASS. Implementation of the user authorization functionality and saving data using the integration with Firebase.

Donut Masterclass [HTML, CSS, SASS, JavaScript, Parcel] - Link
Responsive layout for a website presenting a master class on making donuts. Team project: Dev.
Creating a site heading, and implementing a burger menu by opening a modal window. The stylization of elements by SASS preprocessor, using SCC-animations. Image optimization for different types of devices. Writing simple scripts for page interactivity.
